

HAPPENINGS IN AND ABOUT TOWN

TOYNE FAILS TO QUIT HIS PLACE

Politics Stir Up Muddle in Water Board—Old Employee Dismissed.

(CONTINUED FROM PAGE ONE)

Administration—and he is a real cog in the works board's political machine. This is not saying how Mr. Toyne, superintendent of the waterworks, stood on the dismissal of Mr. Ryneard. It is merely anticipating that perhaps he stood about the same as he understood that he has stood along on the determined retention of Alex. Langel, citizens' candidate for city clerk, who, with George Currie, though Langel himself was defeated, married the Hungarian to the support of the mayor in the campaign. Langel, according to present knowledge, has never been with two whoops to the water department. He was given a job as a keeper, but under the new system recommended by the state board of accounts, and adopted by Supt. Toyne, there was nothing left for him to do. It is known on pretty good authority that when he recommended Langel's dismissal, on the ground that he was merely lumbering by the department, the boardstead, increased the "stock keeping" pay and ordered the books sent back to him, contrary to the state accounting board's orders.

Simply Have to Carry Him.

"We simply have to carry this man Langel," Pres't E. M. Morris is reported to have said, when told of the uselessness of the man on the job. "He did too much for the administration in carrying the vote of the west end during the campaign."

There was a sort of special meeting of the board of works in the common council committee room last week at which this matter of the dismissal of Mr. Toyne was said to have been threshed out. After the meeting, Supt. Toyne is said to have handed Ryneard his passports, without comment, other than that it was the order of the board. In an effort to sidestep the political phase of the matter, Pres't Morris pretends that he has not taken enough care of an automobile used by him in the department work.

And thus speculation, which has existed for the past week in some quarters as to why Supt. Toyne was about to resign, has been turned into speculation as to how he has been induced to stay. Toyne is quoted in some quarters as contending that he has done \$100,000 worth of work each year since he has been superintendent, and feels that he should have more than \$2,000 per year for doing it. Supt. Toyne, however, has denied that he ever thought of such a thing as asking an increase of salary, but that he was before today's meeting and whether the work's board will now ask the council for an increase of superintendent's pay remains to be seen.

What Langel is Paid For. Langel thought continued as "stock keeper" is known to be spending practically all of his time in the west end working republican politics. He is even seriously credited with being considerably engaged in slate-making, on which positions are sold for a price. This also, it is quite well known, was his chief occupation during the Keller-Swartzart campaign and primary, being one of the chief promoters of the Keller slate which threatened for a time to disrupt the citizens' organization, and for which work he was rewarded by the Keller forces with a place on the citizens' ticket. Langel continued his work to the end of the campaign, being one of the "mollycoddlers" who were not interested in the liquor and other vice interests into the belief that Keller, even though elected, "wouldn't be so very hard on them."

That Pres't E. M. Morris has heard the majority bee buzzing for 1917, and that he must have Mayor Keller's favored candidate, and that Langel must be kept on the job for future use, as well as payment for past services, is also said to figure in the situation. There is a difference of opinion, however, as to whether the mayor will favor Morris or Arthur H. Rice, another member of the board of works, but in either case, it is pointed out, Langel might be of great service.

The answer, furthermore, it is pointed out, to Supt. Toyne's threatened resignation, and his failure to file it, may be wrapped up to an extent in what happens to Langel, who, with George Currie, is said to be maintaining headquarters at the Oliver hotel—rather expensive for them—and working for state candidates, and county as well, who may be to the liking of the Keller aggregation. The politics in the water department, however, is a foregone conclusion, even to the point that it was reported late today that Ryneard might be retained along with Supt. Toyne, in the hope of keeping the situation from creeping out.

Jones places the value of the horse at \$150 and alleges that following the injury to the leg, the mare was worthless. The act occurred April 3, 1915. In June a Peal's court where the suit was originally filed, a verdict in favor of the defendant was returned. It was appealed. The case Wednesday was heard before a jury.

PROGRAM PRESENTED BY FRESHMEN CLASS

New School Song is Introduced.

Short Play is Presented.

Closing the various class programs given at the different weekly assemblies at the high school, the freshmen class presented one of the best of the season Wednesday morning in the school auditorium.

The feature of the day was the decorations that adorned the walls and the ceiling of the spacious auditorium. One of the novelties was the cutting loose of about 50 small green and silver balloons which floated over the heads of the students for several minutes. They were released from the roof of the auditorium.

P. W. Kamalopoli, boys' director of the Y. M. C. A., gave a very interesting lecture on "Class Spirit." He commended the freshmen class on the spirit which they displayed at the assembly and urged them to continue it throughout their school term. He also related several short stories which greatly amused the audience. Miss Thelma Paige of the freshmen class gave a whistling act which would cause professionals of the stage to envy her, to say the least. The freshmen class, led by a quartet, introduced for the first time a new school song. The title is "Victory Song," and was written especially for the high school by Francis Ingold Walker, professor of sciences at the New Trist high school in Indianapolis.

A short play was given by the members of the freshmen class, while four boys and girls sang a freshmen song and gave cheers, which were splendidly delivered.

SUMMER SCHEDULE OF PRICES IS EFFECTIVE

Milk Cheaper For Dealers But Public Will Pay Same Old Price.

Summer prices on wholesale milk supplied by members of the St. Joseph County Milk Producers' Association went into effect Wednesday, a month earlier than usual, but there will be no corresponding reduction for the consumer. During the winter the producers have been selling milk to dealers for 17 cents a gallon, but the schedule which went into effect Wednesday gives them only 15 cents a gallon for it. The dealers sell it at eight cents a quart.

According to John S. Borden, county agricultural agent, the early reduction in price was caused by a comparatively easy winter. Owing to this fact the producers have been expecting a demand for a decrease in the price from the dealers and made the reduction of their own accord, rather than to be forced to do it by the retailers.

The producers' association has about 150 members, who comprise only a part of the producers of the county. It was organized last fall and has been one of the most effective farmers' organizations ever gotten together in the county, according to Mr. Borden. A meeting of the association will be held Saturday afternoon at the court house.

CAN'T DISTRIBUTE SAMPLE BALLOTS

Republicans' Plan is Likely to Cause Trouble For Those Responsible.

Plans which have been made by St. Joseph county republican candidates to have a quantity of sample primary ballots printed and distributed are being declared in violation of the primary act of 1915. Under the primary law as interpreted ballots cannot be given out except by the election commissioners who can only distribute the ballots to the various voting places.

It has been learned on good authority that at a meeting of the republican candidates held in the J. M. S. building Monday night a resolution was passed authorizing the printing of a number of sample ballots to be distributed over the county. Each candidate contributed \$5 to the fund to pay the expenses connected with the printing and distribution of the ballots, according to the information given out following the meeting.

Under the primary law this practice is prohibited and violation carries with it fines and penitentiary sentences. There are four sections of the 1915 primary law which cover the point in question. Here they are:

"PRINTER SECRETLY GIVING BALLOTS—PENALTY.

"Sec. 40. If the printer of ballots for any election; or any person employed in printing the same, shall give or deliver, or knowingly permit to be taken any of said ballots, by any person other than a member of the board of primary election commissioners, or to any person, or to be printed any ballot in any other form than the one prescribed by this act, or with the name spelled or the names thereon arranged any other way than authorized by the said board of primary election commissioners, he shall be guilty of a felony, and on conviction thereof shall be imprisoned in the state penitentiary not less than three nor more than 10 years, and be disfranchised for any determinate period not less than 10 years.

"OFFICIALS FURNISHING BALLOTS FRAUDULENTLY.

"Sec. 41. If any member of the board of primary election commissioners shall give or deliver to any person other than the board of primary election commissioners, or shall permit any of them to be taken away except as herein provided, he or they shall be guilty of a felony, and on conviction shall be punished by imprisonment in the state penitentiary not less than one nor more than five years and be disfranchised for any determinate period not less than 10 years.

"REMOVAL OF ELECTION SUPPLIES—PENALTY.

"Sec. 42. If any person shall take or remove in any manner feloniously, or with the consent or permission of the custodian for the time from any place where they may lawfully be under this act, any of such ballots or pencils to be used in the primary (except as an official or custodian under this act, or while within the polling place, for the purpose of voting); or if any such custodian or official shall consent to or permit any of such ballots or pencils to be removed or carried away from the place where they may lawfully be, by any person except an official or custodian under this act, whose duty it is to receive the same, and on conviction of either shall be deemed guilty of a felony, and on conviction shall be punished by imprisonment in the penitentiary for not less than one nor more than five years, and may be disfranchised for any determinate period not less than 10 years.

It is asserted by attorneys who have considered the primary law that the distribution of primary ballots, samples or otherwise, is illegal and that someone will be liable to prosecution for such an act. They assert that the republicans of St. Joseph county are putting themselves in a hazardous position by having sample ballots printed and some insist that should the resolution passed at the meeting Monday night be carried out, prosecution will result.

SIEGEL ARRESTED AS HE COMPLETES TERM

Former Millionaire Merchant Asks For Chance to Pay His Debts.

International News Service: ROCHESTER, N. Y., March 1.—Henry Siegel, former millionaire merchant of New York City, who has just completed a prison term for grand larceny in connection with the failure of his chain of stores and private bank in New York, was re-arrested as he stepped from the Monroe county penitentiary today.

The fresh charges against Siegel are based upon 11 indictments which were found against him at the time of the failure of his stores. Siegel faced his arrest coolly, saying that he had been assured that he would not be prosecuted at the conclusion of his prison term.

"All I want is a chance to pay my debts," said Siegel. "I am given a chance to work and make some money I will pay all my obligations."

E. W. SMITH NEAR DEATH

It is Feared That His Hiccoughing Will Prove Fatal.

International News Service: HARTFORD, Conn., March 1.—Ernest Walker Smith of Farmington, Ala., with offices here and a brother of Herbert Knox Smith, who was ex-Pres't Roosevelt's commissioner of corporations, is in a critical condition at the Hartford hospital.

It is feared he is hiccoughing to death. An operation was successfully performed three days ago for appendicitis and gall stones and a tube was inserted in the gall bladder, which is thought to have caused the hiccoughing. All remedies for relief have thus far failed, and the patient is rapidly weakening.

GIRL TRIES TO END LIFE

Despondent When She Learns Man is to be Married.

International News Service: INDIANAPOLIS, March 1.—Despondent because of a letter which informed her that Raymond Jones, who is to be married in a few days to a society girl of Memphis, Tenn., Miss Clara Judkins, 35 years old, telephone operator, attempted suicide this morning at her home in Irvington. She drank carbolic acid and it is thought she cannot live. Jones formerly lived here and kept company with Miss Judkins. The name of the Memphis girl was not given in Jones' letter.

PROTECT THE FRUIT TREES.

If your young trees were mulched and not properly protected from mice and rabbits, you will probably be surprised when you visit the orchard to find that many of them have been ruined. Mulch is a good thing for the trees, but it is also a good thing for mice and rabbits, and they gather in large numbers around the foot of the trees and eat away the bark.

Protection is easy. The best material is wire screening, although some use tarred paper and veneer from wood. Some orchardists practice trapping snout around the base of their trees, but often times this is neglected and the trees are injured before the work is accomplished.

The protectors should be pressed into the ground deep enough to prevent the mice from crawling under. Personally I prefer wire screening, but in case tarred paper is used it should be promptly removed in the spring to prevent injury from scalding.

EMBARRASSING.

"Did you say these peas were from your own garden?" asked the summer boarder.

"Yes, sire," replied the farmer. "Picked 'em myself early this mornin'."

"Is it necessary to shoot them when you pick them?" inquired the boarder, removing a piece of solder from between his teeth.
